Contents Volume 161

1 Editorial: IEPM: Focus on scheduling
A. Artiba and S.E. Elmaghraby

3 An improved approximation algorithm for the single machine total completion time scheduling problem with availability constraints
C. Sadfi, B. Penz, C. Rapine, J. Błażewicz and P. Formanowicz

11 A travelling salesman approach to solve the *F*/no-idle/$C_{\max}$ problem
N. El Houda Saadani, A. Guinet and M. Moalla

21 The simple *F*2//*C*max with forbidden tasks in first or last position: A problem more complex that it seems
N. El Houda Saadani, P. Baptiste and M. Moalla

32 Complexity of flow shop scheduling problems with transportation constraints
A. Soukhal, A. Oulamara and P. Martineau

42 Solving multi-objective production scheduling problems using metaheuristics
T. Loukil, J. Teghem and D. Tuyttens

62 Resolution of a scheduling problem in a flowshop robotic cell
A. Soukhal and P. Martineau

73 A genetic approach to solving the problem of cyclic job shop scheduling with linear constraints
G. Cavory, R. Dupas and G. Goncalves

86 Executing production schedules in the face of uncertainties: A review and some future directions
H. Aytug, M.A. Lawley, K. McKay, S. Mohan and R. Uzsoy

111 Reducing simulation models for scheduling manufacturing facilities
A. Thomas and P. Charpentier

126 Markovian analysis for performance evaluation and scheduling in *m* machine stochastic flow-shop with buffers of any capacity
M. Gourgand, N. Grangeon and S. Norre

148 Joint economic model for totally adaptive $\bar{X}$ and *R* charts
M.S. De Magalhães and F.D. Moura Neto

162 An integrated product returns model with logistics and marketing coordination
B. Yalabik, N.C. Petruzzi and D. Chhajed

183 Failure replacement and preventive maintenance spare parts ordering policy
T.S. Vaughan

191 Single item lot-sizing problems with backlogging on a single machine at a finite production rate
Y. Song and G.H. Chan

203 Some two-echelon supply-chain games: Improving from deterministic-symmetric-information to stochastic-asymmetric-information models
A.H.L. Lau and H.-S. Lau

224 On a dual queueing system with preemptive priority service discipline
A. Bedford and P. Zeephongsekul

doi:10.1016/S0377-2217(04)00668-X

240 Statistical dependence through common risk factors: With applications in uncertainty analysis
J.R. van Dorp
256 Optimal inventory replenishment policy for a queueing system with finite waiting room capacity
E. Kim
275 A short and mean-term automatic forecasting system—application to textile logistics
S. Thomassey, M. Happiette and J.M. Castelain
285 A note on flow-shop and job-shop batch scheduling with identical processing-time jobs
G. Mosheiov and D. Oron
292 Book Review

295 Editorial: Financial modelling and the quality of corporate reports
J. Spronk and N. van der Wijst
298 On the simulation of portfolios of interest rate and credit risk sensitive securities
N.J. Jobst and S.A. Zenios
325 A volatility decomposition control variate technique for Monte Carlo simulations of Heath Jarrow Morton models
C. Chiarella, L. Clewlow and S. Musti
337 Value at risk methodology under soft conditions approach (fuzzy-stochastic approach)
Z. Zmeškal
348 Risk factor analysis and portfolio immunization in the corporate bond market
M. Bertocchi, R. Giacometti and S.A. Zenios
364 Market discipline of subordinated debt in banking: The case of costly bankruptcy
E. Nivorozhkin
377 On the comparison between the APV and the NPV computed via the WACC
M. Cigola and L. Peccati
386 Estimation of asset demands by heterogeneous agents
R.L. D'Ecclesia and S.A. Zenios
399 Auctions with bidder-determined allowable combinations
S. Park and M.H. Rothkopf
416 The impacts of regulated notions of quality on farm efficiency: A DEA application
E. Dimara, C.J. Pantzios, D. Skuras and K. Tsekouras
432 Cost efficiency measurement with price uncertainty: a DEA application to bank branch assessments
A.S. Camanho and R.G. Dyson
447 Measurement and sources of overall and input inefficiencies: Evidences and implications in hospital services
A. Chen, Y. Hwang and B. Shao
469 The utility of returns to scale in DEA programming: An analysis of Michigan rural hospitals
T.W. Butler and L. Li
478 A column generation approach for solving a non-temporal forest harvest model with spatial structure constraints
I. Martins, M. Constantino and J.G. Borges
499 On "investment decisions in the theory of finance: Some antinomies and inconsistencies"
B. De Reyck
505 The impact of accessibility on the value of information and the productivity paradox
N. Ahituv and G. Greenstein

525 Output specification and performance measurement in fire services: An ordinal output variable approach
H. Jaldell
536 Returns to scale in dynamic DEA
T. Sueyoshi and K. Sekitani
545 Measuring super-efficiency in DEA in the presence of infeasibility
Y. Chen
552 Selective convexity in DEA models
V.V. Podinovski
564 Estimating output targets to evaluate output-specific efficiencies: A statistical framework
D. Gstach
579 A response to comments on modeling undesirable factors in efficiency evaluation
L.M. Seiford and J. Zhu
582 Book Review

585 Selected combinatorial problems of computational biology
J. Błażewicz, P. Formanowicz and M. Kasprzak
598 Optimization of functions with rank-two variation over a box
I.M. Bomze
618 An efficient method for nonlinearly constrained networks
E. Mijangos
636 A hybrid method combining continuous tabu search and Nelder–Mead simplex algorithms for the global optimization of multiminima functions
R. Chelouah and P. Siarry
655 A null-space method for computing the search direction in the general inertia-controlling method for dense quadratic programming
M.A. Gómez
663 Linear programming system identification
M.D. Troutt, S.K. Tadisina, C. Sohn and A.A. Brandyberry
673 Second order symmetric duality for nonlinear multiobjective mixed integer programming
S.K. Mishra and S.Y. Wang
683 Activity consolidation to improve responsiveness
J.L. Rummel, Z. Walter, R. Dewan and A. Seidmann
704 Robust scheduling of parallel machines with sequence-dependent set-up costs
A. Anglani, A. Grieco, E. Guerriero and R. Musmanno
721 Approximation algorithms for the maximum Hamiltonian path problem with specified endpoint(s)
J. Monnot
736 L_1 cheapest paths in "Fjord Scenery"
W. Kulpa, M. Pordzik, L. Socha and M. Turzanski
754 Three-stage flow-shop scheduling with assembly operations to minimize the weighted sum of product completion times
M. Yokoyama and D.L. Santos
771 A branch and bound algorithm for the robust spanning tree problem with interval data
R. Montemanni and L.M. Gambardella
780 Algorithm for minimizing weighted earliness penalty in single-machine problem
S. Pathumnakul and P.J. Egbelu

797 A multi-layer demand-responsive logistics control methodology for alleviating the bullwhip effect of supply chains
J.-B. Sheu
812 Optimal control of a dual service rate M/M/1 production-inventory model
J.R. Bradley
838 Pricing non-storable perishable goods by using a purchase restriction: General optimality results
M.Z.F. Li
854 Performance analysis of assembly systems with unreliable machines and finite buffers
X.-M. Yuan and L. Liu
872 Book Review
874 Contents Volume 161
